

Chair : Ryosuke Takahashi  
 Department of Neurology, Kyoto University Graduate School of Medicine

- ★ **APe-01-1** Reversal of neuropathic pain by spinal segment-targeted subpial dual gene (GAD65 and VGAT) delivery  
 (Pe-059-4) Takahiro Tadokoro  
 Neuroregeneration Laboratory, Department of Anesthesiology, University of California, San Diego, USA
- ★ **APe-01-2** Lenticulostriate arteries and basal ganglia changes in CADASIL, a 7.0-T MRI study  
 (Pe-021-5) Chen Ling  
 Department of Neurology Peking University First Hospital, China
- ★ **APe-01-3** A Rapid Molecular Diagnostic Method for Spinal Muscular Atrophy  
 (Pe-029-4) Kai Chen Wang  
 Cheng Hsin General Hospital, Taipei, Taiwan
- ★ **APe-01-4** Aberrant amygdala activation to pain-elicited fear processing in patients with fibromyalgia  
 (Pe-042-3) Fu-jung Hsiao  
 Brain Research Center, National Yang-Ming University, Taiwan
- APe-01-5** withdrawn
- ★ **APe-01-6** An HCN channel inhibitor benefits a mouse model of spinal muscular atrophy  
 (Pe-030-1) Likai Tsai  
 National Taiwan University Hospital, Taiwan
